CareVention HealthCare News: Cognify's 3rd Annual User Group

Save the date for Cognify's 3rd Annual User Group on April 9-10 in Charlotte, NC.

[Cognify](#), a subsidiary of Tabula Rasa HealthCare (TRHC) is part of TRHC's [CareVention HealthCare](#) Division. The Division includes TRHC's other PACE-focused

subsidiaries/business lines: Capstone Performance Systems, Peak Health Plan Management, Mediture, and eClusive. Medication management services are provided in collaboration with CareKinesis, a Division of TRHC.

The User Group, a prelude to the North Carolina PACE Association's Annual Conference, will feature new topics and multiple tracks with a focus on administration, clinical, compliance, and more.

Online registration is coming soon! For more information, email success@cognify.com.

Quote of the Month

"This (CareKinesis risk score) has been an excellent clinical tool for the providers at ArchCare Senior Life."

- Michael Crismali, MD, Medical Director, ArchCare Senior Life

The MedaCube In-Home Medication Dispensing Device

MedaCube is an in-home dispensing system that helps PACE participants continue to live independently and avoid nursing home or assisted living admission. MedaCube provides real-time notifications to caregivers and nurses when patients do not take medications as expected. CareKinesis also provides 24-hour customer service for clients.

CareKinesis is the exclusive national provider of MedaCube to PACE, and currently has deployed more than 100 MedaCubes across our PACE clients. The average adherence across all devices is greater than 96%, as measured by those participants who received medications from the devices.

For more information, email info@carekinesis.com or call 888-9-PharmD. For 24-hour customer service, please contact 833-971-3480.
